

To Whom It May Concern

We hereby confirm that we received a sample of the Zero Medical model ZLF150AC vaccine storage refrigerator from Zero Appliances (Pty) Ltd on 24/03/2014 We have been operating this unit since that time.

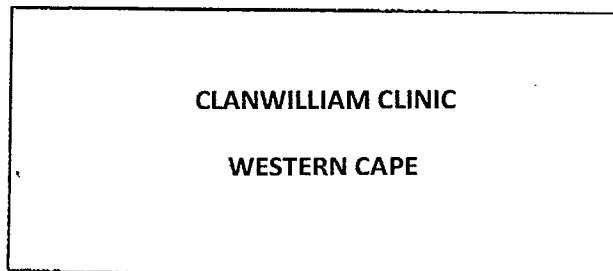

We find the unit easy to use and very reliable. The front opening door is ideal for the storage and managing of our stock. The unit stabilises quite quickly after dispensing and at no stage during dispensing does it go out of the required temperature range.

It is also good to know that our vaccines cannot freeze anywhere inside the storage compartment even if it touches the walls of the compartment simply because the unit has a water jacket and not an ice jacket as is the case with most other units.

The long hold over time on this unit gives us peace of mind knowing that our stock will be at the correct temperatures during power outages, even if the outages last for a number of days.

We wish to thank ZERO for the use of this WHO approved unit which allows us to provide quality health care to all our patients.

Yours faithfully,
