

## ZLF Range Features & Benefits

The cold chain plays a critical role in people's lives, which is why it is more critical than ever to have a refrigeration solution you can rely on. When using the Sure Chill refrigerator, more money can be spent on saving lives rather than replacing heat affected stock. Always remember that as a result of the Sure Chill technology, **vaccines will NEVER freeze** in the compartment.

BELOW ARE SOME FEATURES AND BENEFITS OF THE ZLF PATENTED REFRIGERATOR RANGE

### FEATURES

1. Safe Vaccine Storage
2. **Superior** hold-over time
3. Easy Operation
4. Solar Powered Digital Display External Thermometer
5. Automatic Thermostat
6. Fitted with AVR (Automatic Voltage Regulator) on the AC models and Power Isolator Interrupter on the DC models
7. Ample vaccine storage capacity
8. No defrosting
9. Thick environmentally safe insulation
10. Heavy duty wheels (lockable wheels)
11. Two lockable sealing latches
12. Front opening fridge
13. Durability

### BENEFITS

1. Peace of mind knowing that the product conforms to strict WHO criteria
2. If fully charged, it will maintain the correct cooling temperature at an ambient of 43°C for **10** days without power or even longer at a lower ambient temperature
3. Just plug in and leave, **no thermostat setting is necessary**
4. Allows temperature monitoring even when no power available
5. The Sure Chill inherent temperature regulation will sense hot or cold spots within the fridge compartment and will immediately correct them
6. Protects the compressor and other electronic components from power fluctuations
7. Allows stocking of a broad spectrum of products
8. Saves you time and vaccines
9. Keeps product at correct temperature (i.e. keeps cold in and heat out) and looks after our planet at the same time
10. Easy to move the fridge to any desired / suitable place without any difficulty and lock into position
11. Keeps product safe
12. Easy to access and manage your stock
13. Solid Steel Chromadek construction
